

How do I become a UTHSC-H approved vendor?

UTHSC-H currently does not have an approved vendor list or a self registration tool.

In order to become a UTHSC-H approved vendor, an end user seeking to utilize your products and/or services will need to request a W9 from your company and request for your company to then be set up as a vendor in our financial management system (FMS).

Once set up in FMS, your company will then be eligible to provide products and/or services to UTHSC-H.
