

What is SciQuest?

SciQuest is software used to centralize various vendors' electronic catalogs. Currently there are 19 suppliers participating in this electronic catalog system. The central catalog items list discounted prices specific to The University of Texas Health Science Center at Houston. Generally the catalog lists the most current data on the items available; including backorder and/or discontinued information. Of the 19 participating vendors, 4 also use our Punch Out system. The Punch Out vendors provide a direct link to their website catalogs. There you can obtain specific item descriptions, specifications and images; create your cart and return to SciQuest to proceed with your cart assignment.

What do I use SciQuest for?

When placing an order through any of the 19 CAT vendors, you are the most familiar with what you want to order. You make the decision of what items best suits your needs and costs restrictions. The SciQuest Catalog Assign Cart System gives you the ability to generate carts from various participating vendors and assign them to your departmental administrator. You also have the capability of saving frequently purchased items to a Hot List. Your departmental administrator will review your order and submit to your departmental buyer for processing.

Who can use SciQuest?

SciQuest is primarily used by those with PeopleSoft access, but also provides the ability of Non-PeopleSoft users as well. SciQuest is accessible only within the areas of our institutional network.

How can I get access to SciQuest?

Complete the SciQuest Catalog Security form, have your DMO sign off and submit it to your departmental Buyer. Your account will be setup and a password will be provided. The login site address is <https://solutions.sciquest.com/apps/Router/Login?OrgName=UTHSCH&URL=> and can also be reached via a link on the [Procurement](#) website.
